

“Acoustic Revive” New Product

RHB-20 : Hickory Under-Board

Improvement of the sound in every audible element

A thin under-board made from a rare wood “Hickory”

Hickory is a very rare wood often used for a highest grade drum stick, etc and is a miracle wood to make a drastic improvement of the sound in every audio element, i.e.

Improvement in organic and deep tone, density and resolution, transparency and clearness of the sound stage, etc.

RHB-20 is a very thin under-board(20mm) suitable to install in the standard audio rack easily.

RHB-20 is also suitable to use with other boards or insulators, in resulting to neutralize a peculiar characteristic of such boards or insulators.

As RHB-20 does not have its own characteristic, it does not make the sound worse by using a plural number, but makes the sound more natural and organic.
